Subject: RE: [Liquid Web, Inc. system-restore ID# 4181123] Re: Migration from cpanel-virt.ei-ie.org to guest01.ei-ie.org

Hi Timo,

I checked version is changed. Its 5.3.2 somethig.

Now as for EI project is concern, I am sure its some file is missing since its working fine on same version my local server, see
First see version of php

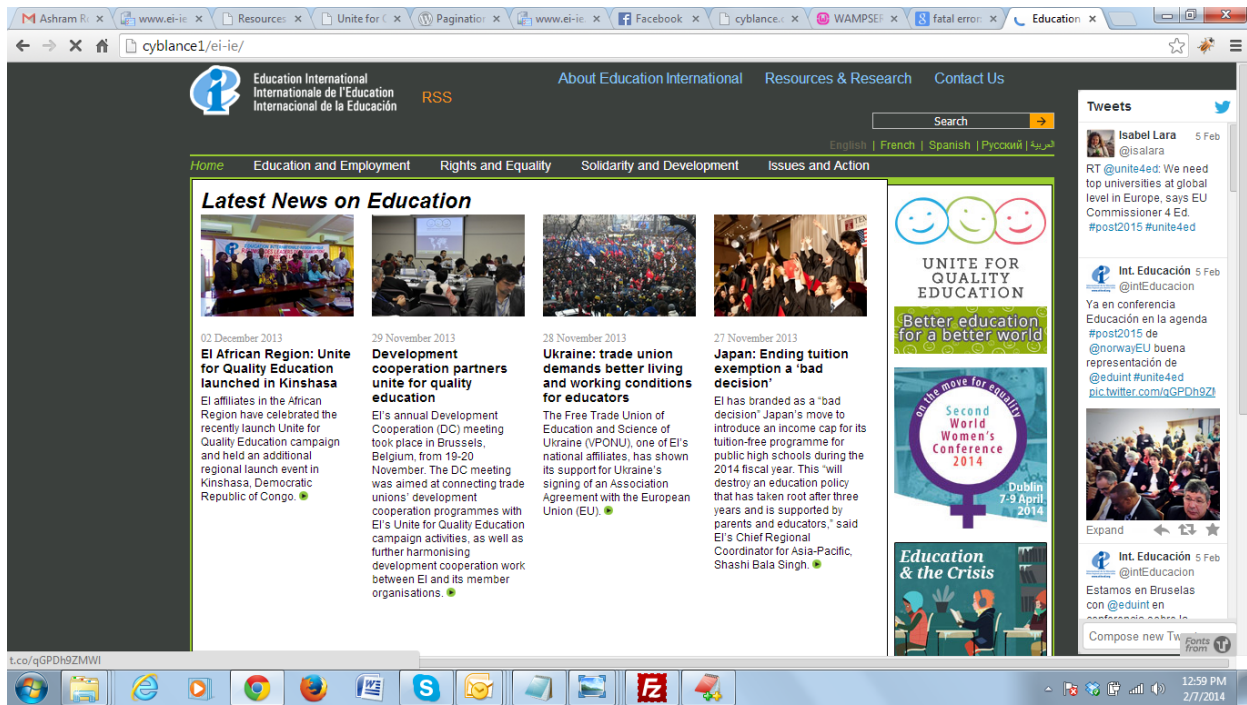

The screenshot shows the WampServer configuration page in a browser. The page title is "WampServer" and it includes a logo. Below the logo, it says "Version 2.1 Version Française". The main section is "Server Configuration" which lists the following details:

- Apache Version : 2.2.17
- PHP Version : 5.3.5
- Loaded Extensions :
 - Core
 - date
 - iconv
 - pcrc
 - tokenizer
 - PDO
 - xmlreader
 - mbstring
 - pdo_sqlite
 - bcmath
 - ereg
 - json
 - Reflection
 - zip
 - openssl
 - xmlwriter
 - mysql
 - mhash
 - calendar
 - filter
 - mcrypt
 - session
 - zlib
 - SimpleXML
 - apache2handler
 - mysqli
 - xdebug
 - com_dotnet
 - ftp
 - SPL
 - standard
 - libxml
 - wddx
 - curl
 - Phar
 - ctype
 - hash
 - odbc
 - mysqlnd
 - dom
 - xml
 - gd
 - pdo_mysql
- MySQL Version : 5.5.8

Under the "Tools" section, there are links for "phpinfo()" and "phpmyadmin". The "Your Projects" section shows ".TemporaryItems" and "25nov screens TTMS". The browser's address bar shows "cyblance1/". The Windows taskbar at the bottom shows various application icons and the system tray with the date and time "12:58 PM 2/7/2014".

In same version, ei is running smoothly

So now I am sure that there is nothing related with cake or php version, its all about some file is missing.

I am trying to upload but it will take 2-3 days to upload from here, sometime connection time out.

Can you double check with hoster to make sure it they re upload everything for EI website and make sure they must not miss any single file.

Please ping me if you have any query.

Thanks,
Shadab
