Union of Education Norway

Ronnie Smith
President
Pan-European Structure, incorporating ETUCE

Consultation review Pan-European structure

- Comments by Union of Education Norway

Union of Education Norway wishes to express its support for the general principles underlying the proposal and the draft for new by-laws for ETUCE in Europe. We find that the proposed new ETUCE by-laws balances the need to establish a clear adherence to Education International and the needed assurance that ETUCE has autonomy in assuring its important representation in relation to European partners and the institutions of the European Union.

We would like to stress that the important issue now must be to agree on questions that might still arise after the consultation. We must reach a final agreement on the new by-laws for ETUCE. In these times, we need to gather our strength and unity to meet important common challenges imposed on our education systems and our members in Europe. If necessary, Union of Education Norway will be ready to participate in dialogues to find solutions.

Yours sincerely,
Union of Education Norway

Mimi Bjerkestrand
