

## Teacher Migration Forum

Teacher Migration has become a global phenomenon and continues to rise to the policy agenda of many governments and organisations. The benefits of teacher mobility, to both sending and receiving countries, have not yet been fully explored, while migrant teachers continue to have their rights violated in far too many instances. The Teacher Migration Forum will focus on a teacher union response to the migration phenomenon and specifically discuss the new Migration Campaign adopted by the EI Executive Board recently. The Forum will enable the participants to share information on current migration trends and possible strategies for protecting the rights of migrant teachers.
